

PRINT THIS PAGE AT 100% on A4 AND USE THE GUIDE BELOW TO HELP YOU DETERMINE YOUR BANGLE SIZE

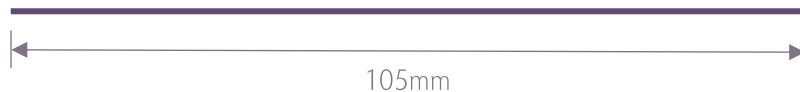

Find a bangle that fits you well. If you are using this guide to purchase a new bangle, make sure your existing bangle is a similar width to the one you are wanting to buy as different shapes and width will fit differently.

Place your bangle over the circles, lining up the inside edge of the bangle with the closest fitting circle. The outside edge of the circle should touch the inside edge of your bangle. If your bangle falls between two sizes, select the larger size for comfort.

Please note that whilst this guide will give you a fairly accurate measurement of your bangle size, we would always advise that you have your wrist & hand / bangle measured by a professional jeweller if at all possible.

To make sure the dimensions on this guide are accurate,
this line should measure exactly 105mm.
